Our Energies

Various Total employees :

- I've been with Total for 22 years. (**subtitles inlay**)
- Total is an oil and petrochemical producer, a major international company. (**subtitles inlay**)
- Different cultures speaking lots of languages, and that makes it so interesting, because of these differences, and so exciting.
- Total is the biggest oil and gas company in the world.
- Total is everywhere.
- Sure, it's a global company.
- 95000 employees, worldwide, across the oil, gas and petrochemical chain. (**subtitles inlay**)
- From finding crude and gas in the field, to marketing the products, to industry and to the consumer.
- This is Total in Chinese.
- It's a huge multinational, a leader in its industry. (**subtitles inlay**)
- You can criticize oil all you want, but petroleum-based products are everywhere. (**subtitles inlay**)
- Total is there when you turn on a light at home, when you start your car to go to work, it delivers mobility. (**subtitles inlay**)
- It's oil, but not just oil. (**subtitles inlay**)
- It's an energy company. (**subtitles inlay**)
- The world needs energy, and we as Total try to give the world the energy it needs. It's what we're doing.
- Today's world is fast-paced, with Asian countries consuming huge amounts. (**subtitles inlay**)
- All of the major oil basins have been explored, we keeping pushing back frontiers. (**subtitles inlay**)
- We need to find new supply, we have to explore more challenging environments than before. (**subtitles inlay**)
- You can push for that, the reserves are there.
- It's very important to us that we have cars on the roads, we can heat our homes. That comes from petroleum.

- Total.
- Total...
- The world is changing. (**subtitles inlay**)
- It's my phone.
- One thing that's very important, more important, is the environment. (**subtitles inlay**)
- We are working in the energy sector, and we can influence a lot. It's a worldwide influence that we're making. So we try to keep our environmental footprint at a minimum.
- Normally, when we talk about chemicals, people are all scared. But in the plant, you can see things flying, the way it's green, it's a nice environment.
- Everybody learns from the past and its mistakes. Total is at the moment going in the right direction.
- For Total, safety comes first.
- We are talking about the planet. That's why we must focus on it, it's very important.
- Today, we probably have the most stringent vessel charter standards.
- When we build new things, we always look at the aspect of what we can also do for the environment, and not only think about us.
- You must think of your children, your great-grandchildren. It's not only about our own situation, it's the future.
- Global warming is a big issue. I want to be part of it, I want to be involved with it, I want to be in a company which takes into consideration the impact on the environment and people.
- Profit brings a lot of responsibility, and Total knows its responsibility.
- It involves every one of us.
- Total.
- Total.
- I think that Total should convert to what we consider new energy.
- I think it's very essential. Oil and gas energy will run out some day. We don't know when. So it's urgent to find a solution.
- As far as energy supply is concerned, we need to look to renewable energies, such as photovoltaics, solar energy and biomass, because we need them.
- Of course you have to innovate. Innovation is a must.
- Diversification is critical, it's been under way for several years, it's expanding and getting better. (**subtitles inlay**)
- It will take more than a year or two ; it will require a lot of effort, many years. (**subtitles inlay**)
- The future won't be easy, it will require work, a lot of hard work.
- We all know that past success is no guarantee of future success. We have many challenges ahead.
- It's not only about providing the world today with energy, but also looking into the future and making inventions. Making inventions for tomorrow.
- Total.
- Total.
- Total!
