Commitment of the Board to risk management

Instances and procedures to identify and anticipate risks at all levels

- Project assessments before all investment decisions
- Risk monitoring on assets

Board of directors
- Audit Committee

Executive Committee
- Risk Committee
- Internal audit Department

Divisions
- Internal control

Monitoring of the recent crises and analysis of their impacts on the Group

- The Macondo accident in the Gulf of Mexico
- Middle East political crisis
- Nuclear accident in Japan
- Tax system changes in producing countries
The example of the Joslyn field in Canada

Impact assessments and development of adequate measures before all decisions
Regular reviews foreseen at all key steps of the project

**Partnership**
- Strategic partnership with Suncor who is an expert in oil sands mining

**Profitability**
- Strong leverage to crude oil price
- Plateau: 30+ years

**Climate**
- Price for CO₂ of 25€ per tonne
- R&D on carbon capture and storage

**Forest / Water**
- 60% of the mine already reclaimed when closed
- Water consumption below the industry’s average

**Local communities**
- Consultation and transparency
- Dialogue structures
- Local content

Anticipate so as to ensure acceptability
Project approved by local authorities
Complementarity-based Corporate Governance

A Board strengthened by the recent* nominations of independent directors holding few other mandates

- 80% of the directors are independent (75% in 2008)
- Since 2008, nomination of 6 new directors holding less than two mandates on average

Specialized committees comprising independent directors, such as:

- The Nominating & Governance Committee, a support for good corporate governance
- The Strategic Committee created in 2011

Increased board diversification after the 2011 AGM*

- 27% women (13% in 2010)
- 27% non-French directors (27% in 2010)

Favoring diversity and skills adjusted to an international and capital-intensive company

* subject to the approval of resolutions 9 and 10 by the shareholders at the May 13, 2011 Annual General Meeting
Compensation of the Chairman and Chief Executive Officer linked to the company’s long-term performance

Criteria applied to the Chairman and Chief Executive Officer’s compensation*

Compensation due for 2010: 3,015,030 Euros

Loss of office
- Severance payment limited to 2 years’ compensation unless misconduct or resignation

Retirement and severance benefits subject to strict performance conditions

* Christophe de Margerie has been Total’s Chairman and Chief Executive Officer since May 21, 2010
Restricted shares and stock option allocation plans rewarding individual performance

Allocation principles
- Large distribution: more than 10,000 beneficiaries
- Limited dilution

The Compensation Committee ensures a balanced allocation of stock options among the different tenderers (Chairman and Chief Executive Officer, executive officers, managers and employees)

Performance conditions
- On all stock options to be granted to the Chairman and Chief Executive Officer and on some of the managers’
- On all restricted shares to be granted to the Chairman and Chief Executive Officer and to the managers as from 2011

Align the interests of the management and the employees with the shareholders’
Encouraging individual and employee shareholding

Shareholding structure by geographic area

- France: 34%
- Middle East and Asia: 5.5%
- Europe (excl. France): 26.5%

Shareholding structure by shareholder type

- Institutional shareholders: 88%
- Group employees: 4%
- Individual shareholders: 8%

About 540,000 individual shareholders

Employees and former employees: 160,000 shareholders*

Share of employees subscribing to the capital increase reserved for employees in 2011: 31%

* pursuant to the 2010 award of restricted shares effective in 2012
Proposed 2010 dividend of 2.28 euros per share, stable compared to 2009

Quarterly interim dividend as from fiscal 2011: first instalment of 0.57 € to be paid on September 22, 2011
Creating value for all stakeholders

2010 Results

Patrick de La Chevardière
Chief Financial Officer
2010: return to growth

4.3% increase in production, mainly from LNG growth
124% proved reserve replacement rate

32% increase in adjusted net income to 10.3 B€, reflecting both improving environment and operational performance
22% increase in gross investments to 16.3 B€

Improved outlook for future growth
Improved environment in 2010 and early 2011

- Increase in oil price reflecting strong demand growth and anticipated supply constraints

- Gas prices rebounded, particularly in the largely oil-indexed Asian markets, but remained stable in North America

- European refining margins still affected by excess capacity in the Atlantic basin

Main market indicators

source: public data on April, 30 2011

* Henry Hub converted into $/boe based on 5.8 Mbtu = 1 boe;
ERMI (European Refining Margin Index), Total’s European Refining margin Indicator
**Spare oil capacity reduced by mid-decade**

**Oil demand growing by more than 1% per year on average by 2020**

Strategy and Outlook

Christophe de Margerie
Chairman and Chief Executive Officer
Main objectives for 2011-2012

Priority to safety and acceptability of our operations

Start up 10 large Upstream projects and launch 12 major Upstream projects
Benefit from rejuvenated exploration portfolio

Continue to adapt refining and petrochemicals
Pursue active portfolio management (acquisitions / sales)

Optimizing the portfolio and securing drivers for future growth
Corporate social responsibility: further progress

2010 achievements

Safety
- Total recordable injury rate decreased by 16% compared to 2009

Climate
- GHG emission decreased by 8% compared to 2008

Diversity
- 23% of Senior Management are non French
- 14% of Senior Management are women

In France
- Over the past 10 years
  - 15,000 jobs created
  - 1,000 small businesses helped

Targets

- 25% decrease between 2009 and 2013
- 15% decrease in 2015 compared to 2008
- 38% by 2020
- 22% by 2020
- Maximize our contribution in host countries
12 major Upstream projects to launch

**Conventional**
- **Ekofisk South (Norway)**
  - Capacity: 70 kboe/d
- **Eldfisk 2 (Norway)**
  - Capacity: 70 kboe/d
- **Hild (Norway)**
  - Capacity: 80 kboe/d
- **Ofon 2 (Nigeria)**
  - Capacity: 70 kboe/d

**Deep Offshore**

2011 exploration budget increased to 1.6 B€

Main objectives for 2011

- UK
- Norway
- Azerbaijan
- French Guyana
- Angola
- Nigeria
- Yemen
- Vietnam
- Brunei
- Indonesia
- Malaysia
- Australia
- Bolivia
- Brazil

*Frontier areas*

**Bold exploration program targeting diversified themes and larger discoveries**
Strengthening asset portfolio on main growth segments

Announced acquisitions in 2010-11

**Canada**
- Heavy Oil
  - Fort Hills
  - Joslyn
  - Voyageur Upgrader

**Russia**
- Gas/LNG
  - Novatek
  - Yamal LNG

**USA**
- Shale Gas
  - Barnett Shale

**Uganda**
- Oil
  - Blocks 1, 2, and 3A

**Australia**
- Coal Bed Methane/LNG
  - GLNG

Access new resources and develop partnerships with local players
Downstream-Chemicals: strengthening competitiveness

Priority to safety and improving reliability of operations

Reducing capacity and breakeven of European Refining

Improving the competitiveness of Petrochemicals by focusing on main platforms

Benefiting from growth in Middle East, Africa and Asia

Strengthening leadership positions in Marketing and Specialty Chemicals

**Increasing ROACE by 4% and doubling net cash flow by 2015 in a constant environment**
Four structural developments in new energies

**Solar**
- **AEPolysilicon**
  - Breakthrough technology to produce granular polysilicon
  - Started up US production facility in 2010
- **Project Shams - Abu Dhabi**
  - One of the world’s largest concentrated solar power plants
  - Construction in progress, start-up: summer 2012(e)
- **SunPower**
  - Friendly tender offer on 60% of SunPower
  - Global company integrated across the solar value chain
  - Highly efficient solar technology

**Biomass**
- **Amyris**
  - Partnership to develop and produce fuels and byproducts from biomass
  - Start-up production of jet fuel and lubricants in 2016(e) in Brazil

**Technological differentiation through innovative partnerships**
Sustained investment program and strong balance sheet

Growth and visibility improved by large number of projects in development and in preparation

Consistency of capital discipline and policy for return to shareholders
Disclaimer

This document does not constitute the annual financial report within the meaning of Article L.451-1-2 of the French monetary and financial code, which is included in the company’s Registration document available on the Group’s Web site at www.total.com or by request from the company’s headquarters.

This document may contain forward-looking statements, including within the meaning of the Private Securities Litigation Reform Act of 1995, notably with respect to the financial condition, results of operations, business, strategy and plans of TOTAL.

Such statements are based on a number of assumptions that could ultimately prove inaccurate, and are subject to a number of risk factors, including currency fluctuations, the price of petroleum products, the ability to realize cost reductions and operating efficiencies without unduly disrupting business operations, environmental regulatory considerations and general economic and business conditions. Neither TOTAL nor any of its subsidiaries assumes any obligation to update publicly any forward-looking statement, whether as a result of new information, future events or otherwise. Further information on factors which could affect the company’s financial results is provided in documents filed by the Group with the French Autorité des Marchés Financiers and the U.S. Securities and Exchange Commission (“SEC”).

Business segment information is presented in accordance with the Group internal reporting system used by the chief operating decision maker to measure performance and allocate resources internally. Due to their particular nature or significance, certain transactions qualified as “special items” are excluded from the business segment figures. In general, special items relate to transactions that are significant, infrequent or unusual. However, in certain instances, certain transactions such as restructuring costs or assets disposals, which are not considered to be representative of normal course of business, may be qualified as special items although they may have occurred within prior years or are likely to recur within following years.

The adjusted results of the Downstream and Chemical segments are also presented according to the replacement cost method. This method is used to assess the segments’ performance and facilitate the comparability of the segments’ performance with those of its competitors.

In the replacement cost method, which approximates the LIFO (Last-In, First-Out) method, the variation of inventory values in the statement of income is, depending on the nature of the inventory, determined using either the month-end prices differential between one period and another or the average prices of the period. The inventory valuation effect is the difference between the results according to FIFO (First-In, First-Out) and the replacement cost.

As from January 1, 2011, the effect of changes in fair value presented as an adjustment item reflects for some transactions differences between internal measures of performance used by TOTAL’s management and the accounting for these transactions under IFRS. IFRS requires that trading inventories be recorded at their fair value using period-end spot prices. In order to best reflect the management of economic exposure through derivative transactions, internal indicators used to measure performance include valuations of trading inventories based on forward prices. Furthermore, TOTAL, in its trading activities, enters into storage contracts, future effects are recorded at fair value in Group’s internal economic performance. IFRS precludes recognition of this fair value effect.

In this framework, performance measures such as adjusted operating income, adjusted net operating income and adjusted net income are defined as incomes using replacement cost, adjusted for special items, excluding the impact of changes for fair value from January 1st 2011, and, through June 30, 2010, excluding TOTAL’s equity share of adjustments related to Sanofi. They are meant to facilitate the analysis of the financial performance and the comparison of income between periods.

Dollar amounts presented herein represent euro amounts converted at the average euro-dollar exchange rate for the applicable period and are not the result of financial statements prepared in dollars.

Cautionary Note to U.S. Investors – The SEC permits oil and gas companies, in their filings with the SEC, to separately disclose proved, probable and possible reserves that a company has determined in accordance with SEC rules. We may use certain terms in this presentation, such as “reserve potential” and “resources”, that the SEC’s guidelines strictly prohibit us from including in filings with the SEC. U.S. investors are urged to consider closely the disclosure in our Form 20-F, File N° 1-10888, available from us at 2, place Jean Millier – La Défense 6 – 92078 Paris – La Défense Cedex, France, or at our Web site: www.total.com. You can also obtain this form from the SEC by calling 1-800-SEC-0330 or on the SEC’s Web site: www.sec.gov.
