OUR BIRTH PLACE

Key facts

Total's presence in Iraq goes back 90 years and the country is, in many ways, the cradle of the company's operations. It was in Iraq that Total acquired its first oil assets, which led to the discovery of the giant Kirkuk field in 1927. Since then Total has forged a long-term partnership with Iraq.

In 2010, the Group resumed its operations in the Iraqi upstream sector, with the development of the Halfaya oilfield located in the Missan province. The Halfaya field, which came on stream in June 2012, is operated by PetroChina, in partnership with Total, state-owned South Oil Company and Petronas.

Since 2012, Total has entered four exploration blocks in the Kurdistan Region of Iraq (Harir, Safen, Taza and Baranan). The Group is also furthering integration across the value chain, expanding its presence in the sale of lubricants and specialty products to industry, business and consumer markets.

In late 2013, Total and the Iraq Ministry for Industry and Minerals signed a Letter of Intent to conduct preliminary studies to assess the feasibility of building a petrochemical complex in the Basra area, on the southern coast of Iraq.

Today, Total remains committed to supporting the development of the whole Iraqi oil industry and is looking to collaborate on further projects.

Historical milestones

1924
The Compagnie Française des Pétroles, Total's forerunner, formally joins the Iraq Petroleum Company (IPC) with a 23.75% interest.

1927
Discovery of the giant Kirkuk field.

1934
Production at Kirkuk begins.

1976
Total brings the Buzurgan and Abu Ghirab fields on stream.

2010
Total signs a 20-year development and production service contract to develop the Halfaya oilfield, as part of a consortium with PetroChina, state-owned South Oil Company and Petronas.

2012
Total acquires shares in three exploration blocks: Harir, Safen and Taza, located in the Kurdistan Region of Iraq.

2013
Total acquires shares in the Halfaya oilfield, as part of a consortium with PetroChina, Petronas and South Oil Company.

2014
Total acquires an 80% interest in the Taza block (Taza) are announced.

Total increases its stake in the Safen block to 80% and takes over the operatorship from Marathon Oil.

AT A GLANCE

OFFICIAL NAME: Republic of Iraq
CAPITAL CITY: Baghdad
POPULATION: 32.6 million
GDP PER CAPITA: US $3,758
CURRENCY: Iraqi dinar
LANGUAGE: Arabic, Kurdish
AREA: 435,444 SQKM
MAIN EXPORTS: Crude oil

TOTAL ACTIVITIES IN IRAQ

- Exploration for oil and gas in Iraq.
- Production and processing of crude oil in the Halfaya oilfield.
- Gas production and supply to power stations.
- Exploration activities in northern Iraq.
- Marketing and distribution of lubricants and other products.
- Refining and chemical activities in Iraq.
- Trading and shipping activities.

EXPLORATION IN NORTHERN IRAQ

- Since July 2012, the Group has acquired interests in four exploration blocks in the Kurdistan Region of Iraq. Today, the Group operates the Safen and Baranan blocks, holding an 80% interest in each block. Total is a partner in the Harir block (35%) operated by Marathon Oil and in Taza (20%) operated by Oil Search.

- In 2013, two discoveries were made on the Taza (Taza) and Harir (Mirawa) blocks. Further appraisal of these discoveries started in 2014, along with additional seismic and appraisal wells.

- In 2013, Total conducted a 220 kilometres 2D seismic campaign on Baranan. A first exploration well on Baranan should be spudded by the end of 2014.

- On the Safen block, Total conducted a 2D seismic campaign in 2014 which should be followed by an exploration well in 2015.

OIL PRODUCTION FROM HALFAYA

- Total is part of a consortium that signed a 20-year development and production service contract for the Halfaya oilfield in January 2010. The contract has been extended to 30 years in 2014.
- The Group has a 22.5% stake in the venture, which includes PetroChina (45% operator), Petronas (22.5%), and the state-owned South Oil Company (10%).
- The Halfaya oilfield is located in the Missan governorate in south-east Iraq, 35 kilometres from the city of Amara. The 300-square kilometre field, discovered in 1976, is estimated to hold 16 billion barrels of oil in place.
- Through technology and investment in large-scale production infrastructure, Total and its partners aim to increase production from Halfaya to 400,000 b/d by 2017. In addition, associated gas from the field will supply a neighbouring power station, helping to provide the province with much-needed electricity.

- Operations at Halfaya started in September 2010 and 40 wells had been connected to the new production facilities by 2014. Drilling operations are conducted with 10 rigs operating simultaneously on site. As many as 800 wells should be drilled to complete the project.

- In September 2012, the consortium reached a production of 100,000 b/d, 30,000 barrels above the contracted target for Phase 1 of the field’s development.

- In August 2014, operations were boosted to 200,000 b/d (Phase 2) and a plateau production of 400,000 b/d is expected by 2017 (Phase 3).

TRADING SHIPPING

- As a world leader in trading activities, Total is one of the most active marketers of Iraqi crude oils.

- In November 2013, a Letter of Intent was signed between Total and the Deputy Minister of Industry and Minerals of the Republic of Iraq. This preliminary agreement plans the study of the feasibility and construction of a world-scale petrochemical complex in the industrial city of Basra.

REFINING & CHEMICALS

- Total Marketing Middle East, a fully-owned subsidiary based in Dubai, markets lubricants in Iraq through four local distributors: Greenpiece (Baghdad area), Atraf al Janoob (Basra area), Safin (KRI) and Najmat Al Barrari (country-wide coverage for Elf Lubricants).

- At the end of 2012, Total signed a contract with the Ministry of Electricity in Baghdad to supply 15,000 tons of lubricants for its power plants during 2013 and 2014.

- In 2013, sales of Total Lubricants to distributors in Iraq were 11,000 tons.
In 2009, Total signed an agreement with Iraq’s Ministry of Oil to provide training to its managerial staff. Four training sessions for approximately 70 managers from the Ministry are scheduled every year.

Under the Total Professors Associates (TPA) programme, the Group sponsors lectures delivered by Total experts at various universities and technical institutes in Iraq. Seven weeks of lectures currently take place every year to benefit approximately 175 Iraqi students.

Total partners with universities and technical institutes in Baghdad, Basra, Kirkuk, Sulaimaniya and Koya. Altogether, more than 250 people benefit every year from the various educational programmes the Group has developed and implements in the country.

In 2003, Total signed a partnership with “La Chaîne de l’Espoir”, a French non-profit organisation that provides surgical and medical treatment for children, to carry out regular humanitarian missions to Iraq.

Since September 2005, around 40 Iraqi children with serious heart conditions have been treated per year in France, Lebanon and Baghdad by specialist surgeons.

In 2008, Total extended its cooperation with “La Chaîne de l’Espoir” and launched a medical assistance programme in Iraq. Besides helping seriously ill children receive advanced surgical treatment abroad, the programme provides comprehensive training to local doctors and paramedics in pediatrics and neonatal surgery.

تقوم شركة "توتال للتسويق في الشرق الأوسط" وهي شركة تابعة لشركة توتال، وهي الشركة المسئولة عن تسويق وبيع المنتجات النفطية في المنطقة والعالم، بتمثيلها في العراق من خلال مقرها في دبي. تركز الشركة على بناء علاقات استراتيجية قوية مع الصرافين المحليين والموزعين، وتعتبر من أكثر الشركات نشاطاً في عالم التسويق لخامات النفط.

اليوم تدير المجموعة العمليات في مجال الاستكشاف والاستغلال حقل حلفاية، الذي يقع في مقاطعة ميسان جنوب شرق العراق، على بعد 3 كم من مدينة العمارة. يحتل الحقل مساحة 3 كيلومتر مربع وقد تم اكتشافه عام 2010 في حفرة بحفرة إنتاجية واحدة. تم اكتشاف حقل حلفاية في سبتمبر/أيلول 2010 برميل يومياً في المرحلة الأولى، وفي عام 2015 باستكمال إنتاج المرحلة الأولى وتمتد لحوالي 400,000 برميل يومياً.

تسعى شركة توتال وشركاؤها - من خلال التقنية والاستثمار في البنية التحتية وإنتاج واسع النطاق وذلك من أجل زيادة الإنتاج من حقل حلفاية، إلى تقديم حلول متميزة لمتطلبات السوق. وتشمل هذه الحلول التسويق وإنتاج نباتات نباتية، وتطوير أساليب جديدة لاستخراج النفط، وتعزيز إنتاجية الحقل وتحسين كفاءة الإنتاج.

تتميز شركة توتال في مجال الاستكشاف والاستغلال بخبرتها ودقة أعمالها، وقد تم استخدامها بنشاط في مجالات مختلفة، بما في ذلك الاستكشاف، والتنمية، وحقول النفط. تركز الشركة على توفير حلول مبتكرة وفعالة لتحديات السوق، وتعتبر من أفضل شركات النفط في العالم.
